

Northcott are able to provide therapy services for children aged 9-15 with a diagnosed disability including global developmental delay in the inner west at school or at home.

The service is available in the following (former) local government areas; Ashfield, Burwood, Canada Bay, Canterbury, Leichhardt, Marrickville and Strathfield.

- Nominated students generally receive 10 therapy sessions each – including a comprehensive assessment and a series of therapy sessions at school and/or home as needed
- We will aim to provide flexible services to fit student and school context and needs
- Places are limited by available funding

Occupational therapists work to improve skills and everyday tasks such as handwriting, dressing, cooking and playing. They can also make sure the home, workplace or school has the right equipment and facilities.

Speech Pathologists can help improve a person's speech and communication skills, build social skills and overcome eating and drinking difficulties.

Physiotherapists can help improve a person's mobility and physical skills as well as recommend equipment to help them participate in activities.
